OBJECTIVE

Undergraduate Information Technology student with hands-on experience in machine learning, deep learning, and applied data science. Strong foundation in algorithms, statistical modeling, and end-to-end ML workflows. Seeking a Data Science Intern role to contribute to the development of reliable, scalable, and user-focused data-driven solutions.

EDUCATION

Maulana Abul Kalam Azad University of Technology (MAKAUT), India

Expected 2028

B.Tech in Information Technology

GPA: 8.6/10.0 (First Year)

Relevant Coursework: Data Structures and Algorithms, Calculus, Computer Organization

SKILLS

Languages	Python, C++
Machine Learning	Scikit-learn, XGBoost, Feature Engineering, Model Evaluation
Deep Learning	TensorFlow, CNNs, Transformers (DeBERTa)
Data Analysis	SQL, Pandas, NumPy, Matplotlib
Tools / Deployment	Git/GitHub, Docker, fast.ai, HuggingFace, FastAPI
Core CS	Data Structures, Algorithms, Problem Solving
Soft Skills	Collaboration, Critical Thinking, Communication

EXPERIENCE

Data Strategy Consultant Intern – Deep Thought (Remote)

Mar 2025 – Aug 2025

Portfolio: graduation.deepthought.education/portfolio/6209

- Improved operational efficiency by **10%** through automated dashboards and reporting workflows.
- Applied ML and analytical methods to refine recruitment processes and project pipeline decisions.
- Collaborated with AI, analytics, and product teams to deliver precise, data-driven recommendations.

Applied Data Science Practitioner – WorldQuant Data Science Lab (Ongoing)

2025 – Present

- Completed time-series forecasting (ARMA) and EDA modules; currently progressing through advanced DS tracks.
- Built structured pipelines and optimized model performance across multiple quantitative datasets.
- Strengthened statistical intuition with emphasis on generalization, model reliability, and evaluation.

McKinsey Forward Program

2025–Present

- Training in structured problem-solving, communication, digital fluency, and professional leadership.

PROJECTS

Mobile Price Classification (ML Zoomcamp) Developed an XGBoost model achieving **89% accuracy** on the Kaggle mobile price dataset. Implemented feature engineering, robust validation, and deployed the model using Docker and Render.

Clickbait Detection (NLP with DeBERTa v3 Small) Fine-tuned a DeBERTa v3 Small transformer to classify clickbait vs non-clickbait headlines. Built a fast.ai training pipeline, improved preprocessing, and deployed an interactive demo on HuggingFace Spaces.
